VoteVantage
Legislative intelligence from Victory Enterprises

Private alpha · Invitation only

Know the record before you make the ask.

Every legislator's votes, bills and district results in one workspace, traced to the source.

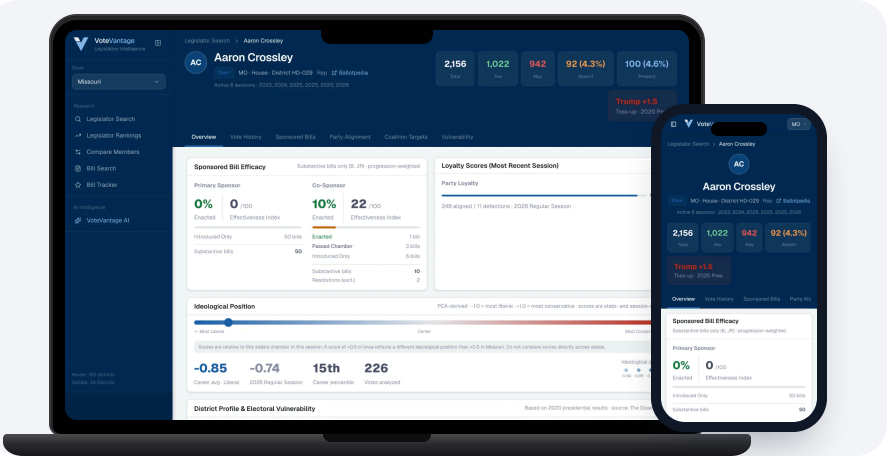

The problem

> Roll calls, bill text and district results sit on different sites, in different formats.

> A party label doesn't tell you who actually votes with your sponsor.

> Hand-built vote tallies are slow to assemble and hard to defend.

VoteVantage puts the whole record in one place for lobbyists and government-affairs teams.

What you get

Live today in the private alpha

LEGISLATORS

Profiles and search. Vote totals, roll-call history, sponsored bills, party alignment and, where published, official portraits.

Rankings and Compare. Efficacy and party-loyalty rankings, each with its method. Put two members side by side across sessions and topics.

BILLS

Bill search and tracking. Status, sponsors, chamber roll calls, official text, and related and companion bills. Track the bills you care about, with your notes and priority.

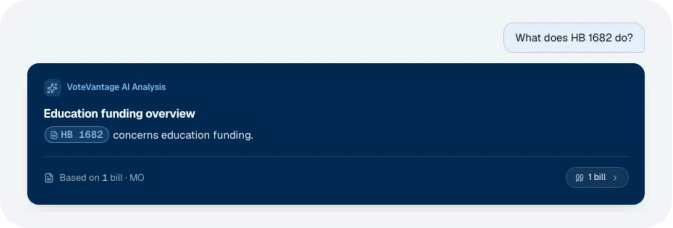

STRATEGY

Coalition Targets. Members who vote with a legislator 85% of the time or more, procedural votes left out. Filter by party to find allies inside a caucus.

District vulnerability. Final-passage votes set against the district's presidential lean, with a salience score and a summary of how each issue cuts for and against the district.

AI Experimental

VoteVantage AI. Ask about bills and members in plain language. Answers cite the bills they're based on.

Research that shows its work

VoteVantage AI **answers cite the bills they're based on**, and every cited bill opens to its full record.

Experimental. Check important answers against the record.

Covered during the alpha
Missouri · Iowa · Oklahoma

LegiScan data
Bills, roll calls and text; official documents linked.

Per-state data status
How far each state's votes run, and when our copy last changed.

Private alpha: request access

Victory Enterprises is testing VoteVantage with a small group of researchers. Nothing is billed during the alpha.

Request access at votevantage.ai

Legislative data from LegiScan (CC BY 4.0). Nonpartisan: the same methods for every member. Screens show a real Missouri House member's public record from an earlier data snapshot; the AI answer is an example.
